Microsoft platform management for K–12 and higher education

Reduce risk, stay in control of your Microsoft environment and maximize the value of your limited IT resources

School districts, colleges and universities are rapidly adopting cloud services like Office 365 to control costs, reduce administrative overhead, and deliver anywhere access to applications that help boost the productivity of students, faculty and staff. But with limited budgets and resources, their IT departments struggle to find time to innovate while keeping critical IT systems such as Active Directory (AD) and Azure AD secure and available 24x7.

Quest enables you to reduce risk and increase the efficiency of your Microsoft environment, so you can stay in control and maximize the value of your limited IT resources. Our award-winning solutions can help you simplify the migration, security and management of your Office 365 or hybrid environment. Our solutions scale from small school districts to community colleges to multi-campus universities.

CAPABILITIES

ZeroIMPACT migration and consolidation

Reduce both the effort and risk associated with migrating or consolidating your Microsoft environment. Learn how our K–12 and higher education software solutions ensure a ZeroIMPACT migration for Office 365, Active Directory, SharePoint, OneDrive, Teams and Exchange. Simplify and automate tasks so you can finish your migration up to 10 times faster while minimizing costs, risk, and disruption to students, faculty and staff.

Cybersecurity

Cybercriminals see your educational institution as an attractive target because its fluid user population can lead to gaps in deprovisioning they can exploit, so you need to be vigilant about keeping your students' data safe. Improve your security posture, ensure compliance, and take full control of Office 365, Azure AD and hybrid AD with solutions that help you assess permissions continuously to identify vulnerabilities; detect and alert on suspicious activity; spot and remediate unauthorized changes; protect critical objects from being modified; automate security management tasks; and investigate and recover from breaches.

Management and administration

Streamline administration of Office 365, AD and Azure AD, SharePoint, OneDrive, Teams and Exchange. Simplify a wide range of tasks, including reporting, user

> "Quest Software provided the perfect solution for our migration from Lotus Notes to Microsoft Exchange and Office 365 mail. We engaged with Quest professional services [and] completed the project in record time."

BENEFITS:

- Secure sensitive data across your cloud or hybrid IT environment.

- Streamline everyday management tasks to free up IT staff time for innovation.

- Modernize legacy infrastructures with fast, automated migration to Office 365 workloads, such as Exchange Online, SharePoint Online, OneDrive for Business and Teams.

- Maintain system availability with fast issue detection and resolution.

- Minimize risk, cost and disruption for users.

and group management, provisioning and de-provisioning, Group Policy and permissions management, and backup and recovery. See how our solutions can automate processes and overcome the limitations of native tools, so you can ensure system availability while freeing up your IT team to investigate and deliver new technologies that empower students, faculty and staff.

Supported platforms

Quest has a long history of helping K–12 and higher education institutions migrate, secure and manage data across a wide range of platforms, including AD, Exchange, SharePoint, Office 365 and now Teams.

Active Directory

Reduce risk and cost by optimizing your Active Directory. Ensure a secure, compliant and available environment with solutions for restructuring and directory consolidation, security and compliance, disaster recovery, and provisioning.

Exchange

Make Microsoft Exchange Server more compliant, available, secure and efficient. Our solutions enable you to migrate, secure, audit, maintain and recover Exchange without using native tools.

G Suite

Easily, efficiently and securely migrate from Gmail and Google Drive to Office 365. Reduce risk, save resources and ensure ZeroIMPACT to end users

Office 365

Simplify your Office 365 migration, management and security needs. Our solutions for Office 365 and Azure Active Directory help you stay in control, whether in Office 365 or a hybrid environment.

OneDrive for Business

Migrate, manage and secure your OneDrive for Business content to streamline data governance and enable effective collaboration.

SharePoint

Accelerate and streamline migration, management and security in your on-premises and cloud-based SharePoint environments.

Teams

Stay on top of Teams management with content discovery, assessment and security reporting. And whether you're migrating Teams from one Office 365 tenant to another or getting content out of file shares, Box, Dropbox and Google Drive, we can easily move your data with minimal disruption to the business.

Windows Server

Make your environment secure, compliant and available. Manage access permissions across your Windows servers from a single console, and easily keep a close eye on the activity of both administrators and end users. Perform capacity planning and enforce storage policies to make the most of your limited budget.

ABOUT QUEST

Quest provides software solutions for the rapidly changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid data centers, security threats and regulatory requirements. Our portfolio includes solutions for database management, data protection, unified endpoint management, identity and access management and Microsoft platform management.
